25X1
25X1 1. [redacted] Graduate Engineer Brunolf C. von Baade [redacted] stated that, recently, Baade had been stationed most of the time at the new airfield at Lukovitz, located southeast of Moscow.³

25X1 2. Baade allegedly worked on acceptance and breaking stress for the latest type of bomber which was under development [redacted]

25X1

25X1

25X1 [redacted] Comment. Lukovitz airfield is 17 kilometers southeast of Kolomna on the railroad line to Ryazan [redacted]

25X1

25X1 [redacted] Comment. The bomber type referred to is the EF-150 (P-150), which was constructed at Podberezye. It is assumed that unforeseen difficulties occurred in the development of the bomber, since fracture tests which had been started in 1951 were still being continued. This fact may also explain the delay in the repatriation of the last German experts from Pilot Plant No. 1 who had been expected to be returned to Germany by December 1952.
